PPWR Declaration of Conformity for Transport Packaging in B2B Business

1. Subject of the statement

This statement relates to the transport and shipping packaging used in connection with our B2B deliveries.

The packaging is used solely for the protection, bundling, storage and safe transport of the products we supply to business customers.

This applies to:

- Wooden pallets or EPAL pallets
- Disposable wooden pallets, where used
- Wooden crates or wooden cases, where used
- Steel strapping and plastic strapping
- Stretch film
- Other protective and transport materials, where used on a case-by-case basis

The products we supply are not themselves packaged as product packaging, unless expressly agreed otherwise in individual cases.

2. Declaration of compliance with Packaging and Packaging Waste Regulation

We hereby declare that we comply with the requirements of Regulation (EU) 2025/40 on packaging and packaging waste applicable to the packaging we use, and that we have implemented, or are continuously implementing, the necessary measures to ensure the conformity of our packaging.

The assessment is carried out considering the applicable requirements of the PPWR, in particular regarding:

- Minimization of packaging weight and volume,
- Avoidance of unnecessary packaging,
- Recyclability,
- Material composition,
- Use of reusable packaging, insofar as this is suitable for the respective application and economically and technically feasible,
- Requirements for the reuse of packaging, where applicable.

3. Reusable transport packaging

Where technically and organisationally feasible, reusable transport packaging is used. This includes EPAL pallets or comparable reusable load-bearing units, which are designed for repeated use and can be used multiple times within corresponding return or pooling systems.

The use and return of such reusable packaging shall be carried out in accordance with the relevant contractual and logistical agreements with our business partners.

4. Single-use transport packaging

Where single-use transport packaging is used, it is selected in accordance with the applicable legal requirements and the principle of minimizing packaging use and packaging waste as far as is technically and economically feasible.

Where possible, the packaging materials used are selected in such a way as to enable material recovery or recycling via the respective existing waste disposal and recovery systems.

PPWR Declaration of Conformity for Transport Packaging in B2B Business

5. Packaging Materials

Our transport packaging may comprise the following materials:

Packing	Material	Use
EPAL-Palett / reuseable pallet	wood	Transport and storage
One-way pallet (reusable)	wood	Transport and storage
Wooden box	wood	Protection and transport
Boxes	carton	Transport and storage
Steel strapping	steel	Protection and bundling
Plastic strapping	plastic	Protection and bundling
Stretchfolie	plastic	Protection and bundling

Our packaging is 100% recyclable. The specific packaging is selected depending on the product, weight, dimensions, transport route and the level of product protection required.

6. Material composition and prohibited or restricted substances

We declare that, to the best of our current knowledge and based on the information provided to us by our partners, the packaging we use does not contain any substances that are prohibited or restricted under the applicable requirements of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR), insofar as these restrictions apply to the packaging in question. To the best of our knowledge, the packaging materials used comply with the applicable legal requirements.
Where statutory limit values or concentration limits apply to individual substances, these are complied with according to the information available to us.

7. B2B-Business

We supply exclusively to business-to-business (B2B) customers. The packaging used is predominantly transport packaging and is not provided to end consumers as sales or product packaging. The relevant obligations regarding take-back, collection, reuse, recovery and disposal depend on the specific type of packaging, the Member State and the applicable implementing provisions.

8. Documentation and evidence

We document and retain the information and evidence relevant to the assessment of compliance in accordance with legal requirements, e.g.:

- Details of packaging materials and packaging weights,
- Information from packaging suppliers,
- Evidence of material composition,
- Details regarding reusability,
- Evidence of recyclability or recoverability,
- supplier declarations and declarations of conformity,
- internal assessments and risk assessments.

9. Scope

This declaration applies to the transport packaging used by us, insofar as it falls within the scope of Regulation (EU) 2025/40. It does not constitute confirmation of the conformity of packaging provided by customers themselves or subsequently modified.

10. Declaration

We confirm that the above information has been provided to the best of our knowledge and on the basis of the information available to us at the time of issue.
